

IN THE CLAIMS

Claim 1 (Currently Amended): A procedure to transmit information in connection with a telephone answering service which is provided by a mobile answer device in a mobile telephone system comprising:

connecting a calling subscriber to the mobile answer device when a called subscriber can not be accessed;

storing information that originates from the calling subscriber on the mobile answer device; and

transmitting a text message containing the stored information, in parallel to transmitting recorded speech messages from the calling subscriber, to the called subscriber when the called subscriber ~~establishes~~ requests a wireless connection to the mobile answer device to listen to recorded speech messages.

Claim 2 (Previously Presented): The procedure as claimed in claim 1, wherein the stored information includes the calling subscriber's number, which is transferred automatically to the mobile answer device.

Claim 3 (Previously Presented): The procedure as claimed in claim 1, wherein the stored information includes one at the calling subscriber in advance stored message, which is transferred automatically to the mobile answer device.

Claim 4 (Previously Presented): The procedure as claimed in claim 1, wherein the stored information contains an optional number, which is transferred by the calling subscriber to the mobile answer device.

Claim 5 (Previously Presented): The procedure as claimed in claim 1, wherein the text message is connected to an application at the called subscriber's mobile terminal.

Claim 6 (Previously Presented): The procedure as claimed in claim 5, wherein the application connects a number with a telephone list.

Claim 7 (Previously Presented): The procedure as claimed in claim 1, wherein the text message is transmitted by a short text message service.

Claim 8 (Previously Presented): The procedure as claimed in claim 7, wherein the short text message service is an SMS (Short Message Service) or a USSD (Unrestricted Supplementary Services Data).

Claim 9 (Currently Amended): A method of transmitting information between a calling subscriber and a called subscriber in a mobile telephone system, comprising:
connecting a calling subscriber to a mobile answer device when a called subscriber cannot be reached;

storing information that originates from the calling subscriber on the mobile answer device; and

transmitting a text message containing the stored information, in parallel to transmitting recorded speech messages from the calling subscriber, to the called subscriber when the called subscriber ~~establishes~~ requests a wireless connection to the mobile answer device to listen to recorded speech messages.

9

Claim 10 (Previously Presented): The method as in claim 9, further comprising:
transmitting the text message as a SMS (Short Message Service) or as a USSD (Unrestricted Supplementary Services Data).
